

MOHD FAIZ ASLAM

Senior Software Engineer | Java | Spring Boot | Python | Microservices | GenAI
India | faizaslam10@gmail.com | +91-8171011960 | [LinkedIn](#) | [Github](#)

SUMMARY

Senior Full Stack Engineer with 4.6+ years of experience architecting and developing scalable microservices, enterprise solutions, and frontend-integrated applications using Java, Spring Boot, Kafka, Angular, React, Python, and AI-assisted development tools including OpenAI, GitHub Copilot, and Microsoft Copilot. Expertise in secure API development, backend automation, frontend integration, performance optimization, production support, and CI/CD pipeline implementation across healthcare and enterprise domains. Proven track record of reducing API latency, resolving critical production issues, and collaborating with cross-functional teams to deliver high-performance full stack solutions in Agile environments.

SKILLS:

- **Backend:** Java, Spring Boot, Spring Security, Hibernate
- **Programming:** Java, JavaScript, Python
- **AI/GenAI:** OpenAI, GitHub Copilot, Microsoft Copilot, Prompt Engineering, GenAI-assisted Development
- **Messaging:** Apache Kafka (Consumer Services)
- **Cloud & DevOps:** AWS (EC2, S3), Azure CI/CD, Jenkins, YAML
- **Architecture:** Microservices, REST APIs, Event-Driven Architecture, API Gateway
- **Databases:** MySQL, PostgreSQL
- **Monitoring & Logging:** Kibana, AWS CloudWatch
- **Testing:** JUnit, Mockito
- **Tools:** GitHub, GitLab, Postman, Swagger UI, SonarQube
- **Frontend:** Angular, React, UI Integration

PROFESSIONAL EXPERIENCE

LTIMindtree (formerly Mindtree)
Senior Software Engineer

Noida, IN
Oct '21 – Present

- Designed and developed scalable microservices using Spring Boot for enterprise-grade applications.
- Built secure REST APIs with JWT-based authentication and role-based authorization.
- Implemented event-driven communication using Kafka for asynchronous processing.
- Designed REST APIs with pagination, filtering, and sorting for large-scale datasets.
- Improved API performance by optimizing service-layer logic and reducing redundant database calls (~30% latency reduction).
- Implemented global exception handling and request validation mechanisms to ensure API robustness.
- Participated in architectural discussions and collaborated with onshore stakeholders for system design decisions.
- Contributed to Azure-based CI/CD pipelines using YAML configurations for automated deployments.
- Managed deployments across DEV, TEST, UAT, and PROD environments.
- Resolved critical production incidents including timeout failures, runtime exceptions, and data inconsistencies.
- Mentored junior developers through code reviews and technical guidance.
- Leveraged GitHub Copilot, Microsoft Copilot, and OpenAI for code acceleration, prompt engineering, full stack productivity, and workflow optimization.

PROJECTS

Philips ITAAP – Enterprise Microservices Ecosystem (Oct 2021 – Dec 2024)

Large-scale enterprise platform consisting of multiple microservices supporting Philips internal systems.

- Designed and built Kafka consumer microservices for asynchronous inter-service communication.
- Developed secure REST APIs using Spring Security with JWT-based authentication and authorization.
- Improved service performance by identifying inefficient service calls and optimizing request handling logic.
- Implemented pagination, filtering, and validation mechanisms for efficient data processing.
- Reduced API response time by ~30% through service-layer optimization.
- Integrated SonarQube for static code analysis and code quality enforcement.
- Configured Azure CI/CD pipelines using YAML-based deployment configurations.
- Monitored application logs using Kibana and resolved production-level service failures.
- Participated in architecture and design discussions with onshore teams.
- Mentored junior developers and conducted code reviews.
- Developed and supported Angular & React-based UI integrations for enterprise applications.

Caterpillar – Enterprise Full Stack Modernization (Jan 2025 – Present)

Enterprise full stack services supporting distributed microservices architecture.

- Architected and developed scalable microservices using Spring Boot and PostgreSQL.
- Implemented Kafka-based messaging services to support asynchronous processing.
- Built secure REST APIs with validation and global exception handling.
- Deployed backend services on AWS EC2 with S3 integration for object storage.
- Configured environment-based deployments across DEV, TEST, UAT, and PROD environments.
- Monitored application logs using Kibana and AWS CloudWatch.
- Diagnosed critical production incidents and improved system stability.
- Collaborated with onshore architects and business teams on system design and enhancements.
- Led backend module development and mentored junior developers to ensure timely sprint deliveries.
- Supported frontend integration by assisting with Angular & React-based UI changes and API consumption.
- Implemented Python-based automation and leveraged OpenAI, GitHub Copilot, and Microsoft Copilot for backend productivity, intelligent workflow optimization, and development acceleration.

CERTIFICATIONS & AWARDS

- **AWS Certified Developer – Associate (2025)**
- **Super Crew & Trailblazer Award:** Honoured with the Super Crew & Trailblazer award for consistently going above and beyond in the project execution and teamwork.
- **AWS Cloud Practitioner (2023)**
- **Azure Fundamentals (2022)**

EDUCATION & OTHER

- | | |
|--|------------------|
| • M.Tech in Software Engineering
BITS PILANI (WILP) | <i>Nov 2025</i> |
| • Bachelors in Computer Applications
ALIGARH COLLEGE OF ENGINEERING & TECHNOLOGY | <i>Sept 2021</i> |
